ESG Commitment

We believe that a commitment to the principles of environmental, social and governance (ESG) not only makes good business sense but also complements our Group business strategy and our corporate values. Our policy is based on the following principles:

- Aligning and focusing the Group’s activities on business priorities to drive delivery.
- Enabling the tracking of our performance, impact and the value we create as a business.
- Supporting communication with our stakeholders including employees, customers, shareholders and communities.

ESG Strategy

In developing our strategy and setting out our ESG policy, we seek to drive continuous improvement and support our engagement with all stakeholders, internal and external. To help define our policy we have divided it into the five areas of our ESG strategy:

We help our people to flourish and grow in an inclusive and supportive environment.	We create sustainable, longterm opportunities in our communities to support social and economic development. We are committed to the health and wellbeing, safety and security of our people, customers and operators.	We aim to minimise our impact on the environment and aim to manage noise, protect air quality, and support the circular economy.
